Table of contents

1 EXECUTIVE SUMMARY 17
1.1 Overview of the neuromorphic computing and sensing market 17
1.1.1 Global Market Revenues 2024-2035 19
1.1.2 Market segmentation 20
1.2 Ending of Moore's Law 22
1.3 Historical market 23
1.4 The market in 2024 24
1.5 Key market trends and growth drivers 25
1.6 Market challenges and limitations 26
1.7 Future outlook and opportunities 28
1.7.1 Emerging trends 28
1.7.1.1 Hybrid Neuromorphic-Conventional Computing and Sensing Systems 28
1.7.1.2 Edge AI and IoT 28
1.7.1.3 Quantum Computing 29
1.7.1.4 Explainable AI 30
1.7.1.5 Brain-Computer Interfaces 31
1.7.1.6 New Application Areas and Use Cases 31
1.7.1.7 Disruptive Business Models and Services 32
1.7.1.8 Collaborative Ecosystem Development 32
1.7.1.9 Skill Development and Workforce Training 33
1.7.2 Technology roadmap 34
1.8 Neuromorphic computing and generative AI 36
1.9 Market value chain 37
1.10 Market map 38
1.11 Funding and investments 39
1.12 Strategic Partnerships and Collaborations 40
1.13 Regulatory and Ethical Considerations 42
1.13.1 Data Privacy and Security 42
1.13.2 Bias and Fairness in Neuromorphic Systems 42
1.13.3 Intellectual Property and Patent Landscape 43
1.13.4 Environmental Impact and Sustainability 43

2 INTRODUCTION 45
2.1 Definition and concept of neuromorphic computing and sensing 45
2.2 Main neuromorphic approaches 46
2.2.1 Large-scale hardware neuromorphic computing systems 48
2.2.2 Non-volatile memory technologies 49
2.2.3 Advanced memristive materials and devices 50
2.3 Comparison with traditional computing and sensing approaches 51

© Future Markets, Inc 2024. All rights reserved.

2.4 Neuromorphic computing vs. quantum computing 52
2.5 Key features and advantages 53
2.5.1 Low latency and real-time processing 54
2.5.2 Power efficiency and energy savings 54
2.5.3 Scalability and adaptability 54
2.5.4 Online learning and autonomous decision-making 55
2.6 Markets and Applications 55
2.6.1 Edge AI and IoT 57
2.6.2 Autonomous Vehicles and Robotics 59
2.6.3 Cybersecurity and Anomaly Detection 61
2.6.4 Smart Sensors and Monitoring Systems 62
2.6.5 Datacenter and High-Performance Computing 63

3 NEUROMORPHIC COMPUTING TECHNOLOGIES AND ARCHITECTURE 66
3.1 Spiking Neural Networks (SNNs) 67
3.1.1 Biological inspiration and principles 68
3.1.2 Types of SNNs and their characteristics 69
3.1.3 Advantages and limitations of SNNs 69
3.2 Memory Architectures for Neuromorphic Computing 70
3.2.1 Conventional memory approaches (SRAM, DRAM) 70
3.2.2 Emerging non-volatile memory (eNVM) technologies 70
3.2.2.1 Phase-Change Memory (PCM) 71
3.2.2.2 Resistive RAM (RRAM) 72
3.2.2.3 Magnetoresistive RAM (MRAM) 72
3.2.2.4 Ferroelectric RAM (FeRAM) 72
3.2.3 In-memory computing and near-memory computing 73
3.2.4 Hybrid memory architectures 74
3.3 Neuromorphic Hardware and Processors 75
3.3.1 Digital neuromorphic processors 75
3.3.2 Analog neuromorphic processors 76
3.3.3 Mixed-signal neuromorphic processors 76
3.3.4 FPGA-based neuromorphic systems 77
3.3.5 Neuromorphic accelerators and co-processors 77
3.4 Software and Frameworks for Neuromorphic Computing 78
3.4.1 Neuromorphic programming languages and tools 79
3.4.2 Neuromorphic simulation platforms and frameworks 79
3.4.3 Neuromorphic algorithm libraries and repositories 80
3.4.4 Neuromorphic software development kits (SDKs) 81

4 NEUROMORPHIC SENSING TECHNOLOGIES AND ARCHITECTURES 83
4.1 Event-Based Sensors and Processing 83
4.1.1 Neuromorphic vision sensors 84
4.1.2 Neuromorphic auditory sensors 86

© Future Markets, Inc 2024. All rights reserved.

4.1.3 Neuromorphic olfactory sensors....86
4.1.4 Event-driven processing and algorithms....87
4.2 Hybrid Sensing Approaches....88
4.2.1 Combination of conventional and event-based sensors....90
4.2.2 Fusion of multiple sensing modalities....91
4.2.3 Advantages and challenges of hybrid sensing....91
4.3 Neuromorphic Sensor Architectures and Designs....92
4.3.1 Pixel-level processing and computation....92
4.3.2 Sensor-processor co-design and integration....93
4.3.3 Bio-inspired sensor designs and materials....93
4.4 Signal Processing and Feature Extraction Techniques....94
4.4.1 Spike-based Encoding and Decoding....95
4.4.2 Temporal and Spatiotemporal Feature Extraction....96
4.4.3 Neuromorphic Filtering and Denoising....97
4.4.4 Adaptive and Learning-Based Processing....98
5 MARKET ANALYSIS AND FORECASTS....100
5.1 Mobile and Consumer Applications....100
5.1.1 Smartphones and wearables....101
5.1.2 Smart home and IoT devices....102
5.1.3 Consumer health and wellness....103
5.1.4 Entertainment and gaming....104
5.2 Automotive and Transportation....107
5.2.1 Advanced Driver Assistance Systems (ADAS)....108
5.2.2 Autonomous vehicles and robotaxis....110
5.2.3 Vehicle infotainment and user experience....112
5.2.4 Smart traffic management and infrastructure....113
5.3 Industrial and Manufacturing....117
5.3.1 Industrial IoT and smart factories....118
5.3.2 Predictive maintenance and anomaly detection....119
5.3.3 Quality control and inspection....121
5.3.4 Logistics and supply chain optimization....122
5.4 Healthcare and Medical Devices....126
5.4.1 Medical imaging and diagnostics....127
5.4.2 Wearable health monitoring devices....128
5.4.3 Personalized medicine and drug discovery....130
5.4.4 Assistive technologies and prosthetics....132
5.5 Aerospace and Defense....135
5.5.1 Unmanned Aerial Vehicles (UAVs) and drones....136
5.5.2 Satellite imaging and remote sensing....138
5.5.3 Missile guidance and target recognition....139
5.5.4 Cybersecurity and threat detection:....140

5.6 Datacenters and Cloud Services 144
5.6.1 High-performance computing and scientific simulations: 144
5.6.2 Big data analytics and machine learning 146
5.6.3 Cloud-based AI services and platforms 148
5.6.4 Energy-efficient datacenter infrastructure 149
5.7 Regional Market Analysis and Forecasts 153
5.7.1 North America 153
5.7.2 Europe 154
5.7.3 Asia-Pacific 156
5.7.4 Rest of the World 158
5.8 Competitive Landscape and Key Players 160
5.8.1 Overview of the Neuromorphic Computing and Sensing Ecosystem 160
5.8.2 Neuromorphic Chip Manufacturers and Processors 160
5.8.3 Neuromorphic Sensor Manufacturers 161
5.8.4 Emerging Non-Volatile Memory (eNVM) Manufacturers 162
5.8.5 Neuromorphic Software and Framework Providers 163
5.8.6 Research Institutions and Academia 164
