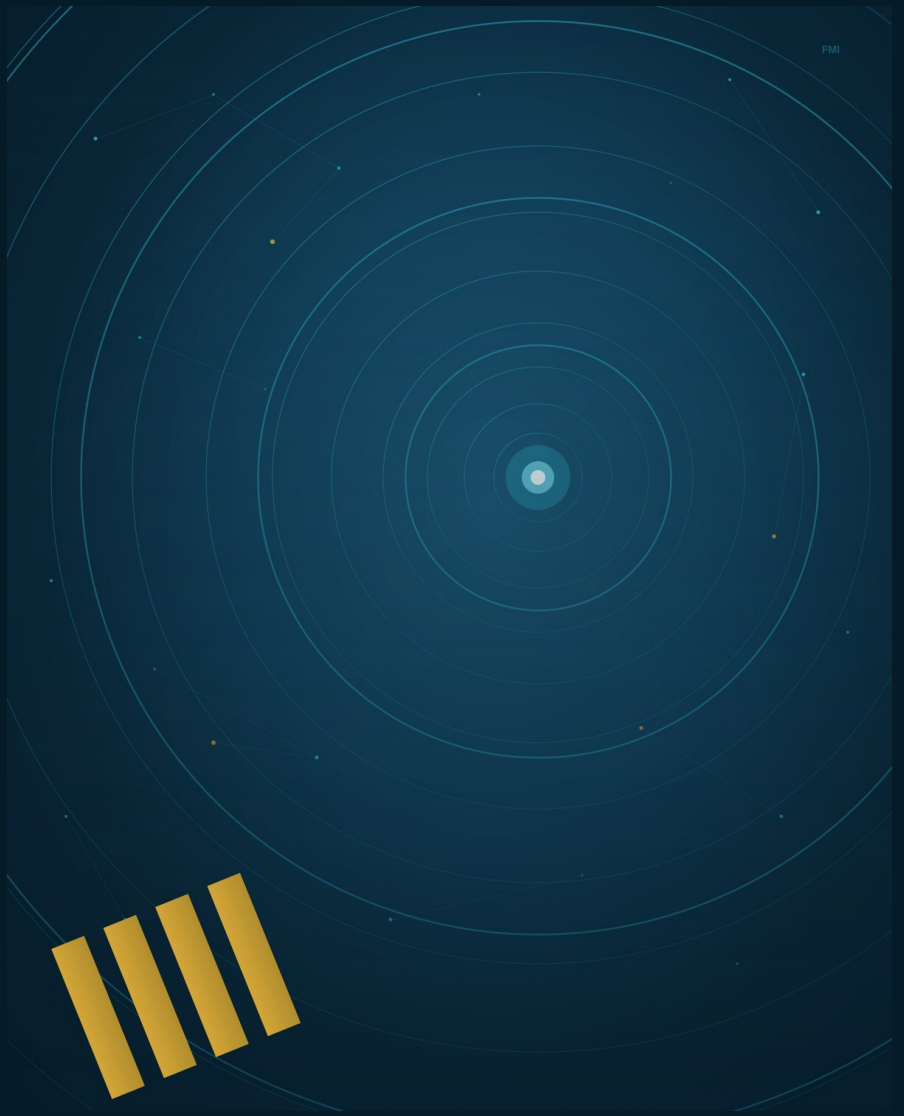
CLIENT GUIDE

FUTURE MARKETS, INC. — 2026

How You Access Your Reports

THREE DELIVERY CHANNELS · ONE LIBRARY



OVERVIEW

Three ways to access your content

Whether you have a single report, an organisation-wide subscription or an institutional licence, here is how your team gets to the content. Same library, different delivery channel.

PATH A

Website account

Individuals and small teams.

- Reports in your personal account on futuremarketsinc.com
- Direct download link emailed for each report
- Sign in anytime to preview or re-download
- Unlimited re-downloads on any device

PATH B

Corporate portal

Corporate and government subscribers.

- Dedicated portal on Microsoft 365 / SharePoint
- Sign in with corporate credentials (SSO)
- Reports organised by 34 vertical categories
- Updates added automatically during the term
- Audit logs for IT and procurement teams

PATH C

Library portal

Academic libraries and institutions.

- Dedicated portal hosted on Box (ISO 27001 certified)
- Federated sign-in: OpenAthens, Shibboleth, SAML 2.0
- MARC21 records + KBART file for your discovery service
- COUNTER 5 usage reports delivered quarterly
- Perpetual access to content from subscribed years

PATH A · WEBSITE ACCESS

Accessing your reports from our website

Once your purchase is confirmed, your reports are available immediately and stay in your account for unlimited re-download.

01

Receive confirmation

An order confirmation email arrives with a direct download link for each report you purchased. Your personal account is created at the same time.

02

Sign in to your account

Visit futuremarketsinc.com and sign in with the credentials in your confirmation email. Your “My Reports” area lists everything you have access to.

03

Open or download

Click any report to preview it in-browser or download the full PDF. No size limits, no extra steps.

04

Return anytime

Your account stores every report you’ve bought — re-download as often as you need, on any device, with no extra cost.

Time from confirmation to first download: **immediate**. *Reports stay in your account for unlimited re-download.*

PATH B · CORPORATE SUBSCRIPTION

Accessing your subscription portal

Site-wide access for your whole team. Your IT setup is straightforward — normally completed within one working day.

01

Portal provisioned

On day one of your subscription, your dedicated portal is created on Microsoft 365 / SharePoint. Your admin contact receives access credentials and a brief setup guide.

02

Sign in with SSO

Your staff sign in using your existing corporate credentials (Microsoft 365, Azure AD, Okta or Google). No new passwords. One-time IT setup, typically 30 minutes.

03

Browse by category

Reports are organised by the 34 vertical categories. Drill into any category to see all titles in your subscribed scope, with new additions flagged.

04

Preview or download

Open any report in-browser or download as PDF. Download whole categories as a zip. Access logs are available to your admin for usage reporting.

Time from contract signing to first download: **typically same day for SSO-ready organisations**. *Unlimited users. Unlimited downloads.*

PATH C · LIBRARY ACCESS

Accessing the FMI library at your institution

Federated authentication and library-standard discovery integration. Students, faculty and researchers reach our content the same way they reach any other licensed e-resource.

01

Portal provisioned

On day one your library receives a dedicated, access-controlled folder on Box (ISO 27001). MARC21 records and a KBART file are delivered to your library systems team.

02

Federated sign-in

Users authenticate through OpenAthens, Shibboleth or SAML 2.0 — the same way they sign in to JSTOR, ScienceDirect or Web of Science. Walk-in IP authentication also supported.

03

Discoverable in your catalogue

Reports surface in EBSCO Discovery, Ex Libris Primo, ProQuest Summon and OCLC WorldCat. Discovery-layer links resolve directly to full text in the portal.

04

Read, download, lend

Open in-browser, download as PDF, or share via interlibrary loan under standard secure-electronic-delivery rules. COUNTER 5 usage reports issued quarterly.

Library subscribers retain **perpetual access** *to content published during any subscribed year, even after non-renewal.*

FROM DAY ONE

What you'll experience

The same content, delivered in whichever way fits your access level.

If you have one report

Sign into your account on futuremarketsinc.com or use the link in your confirmation email to download. The report stays in your account so you never need to chase a lost email.

If your organisation subscribes

We provision a dedicated portal. Your IT team configures SSO once. From then on, your staff sign in with their normal credentials and download any report at any time.

If you have a vertical subscription

Same account, but your dashboard shows every report in your subscribed vertical — plus everything new published in that vertical during your subscription year.

If you're an academic library

Your institutional licence gives campus-wide access via OpenAthens, Shibboleth or IP. Content surfaces in your discovery service. Perpetual rights to content from any subscribed year.
